

Hong Kong

Success & Associate Engineering (S&A) was established in 1987 and has built up a professional team of almost 30 staff. A Hong Kong-based interior design and construction firm, it provides creative interior design solutions for both residential and commercial interiors.

Emerald Green is a winning design project from S&A which stemmed from the brief by the client (a developer) 'to bring innovation and cyberspace' to this newly built flat. The designer chose a cool scheme for its interior with colour themes including silver, grey and purple. This helped to create a mood to match the feature glass panel and also the vertical lights which serve as a backdrop to the living area. These emerge from

behind a mirror in the form of tubes which reflect between the glass and the mirror to create a fantasy that sparks the imagination.

Space grey marble flooring intentionally forms an exception zone which gives the impression of entering into an entirely different atmosphere. This neoteric design came from an idea translating to barcode-like parallel stripes that define the flat's living and dining area from wall to ceiling, giving a sense of complexity. The resultant effect results in the eye being almost compelled to explore every detail of the space. Emerald Green now boasts an impressive virtual home interior that is not only stylish but also bustling and vivid.

Success & Associate Engineering Co Ltd

Flat C/D, 18/F Kings Tower,
No 111 King Lam Street,
Cheung Sha Wan,
Kowloon, Hong Kong
